CARROLLTON BANCORP REPORTS QUARTERLY DIVIDEND & INCREASED FIRST QUARTER EARNINGS

BALTIMORE, MARYLAND - Carrollton Bancorp (NASDAQ: CRRB) announced today a quarterly dividend of \$0.09 per share, payable June 2, 2003 to shareholders of record on May 15, 2003. Robert A. Altieri, President & CEO, stated that the cash dividend rate was based on stable current earnings and future prospects for the Company. Mr. Altieri reported that net income for the quarter ended March 31, 2003 increased 7% to \$349,000, or \$0.12 per share, compared to \$326,000, or \$0.11 per share, for the same period of 2002.

The commitment to the Company's business strategies set forth in 2001 continues to show positive balance sheet results; however, the volatile market conditions and ongoing economic uncertainty have had an impact on the Company's ability to transition into an institution rivaling its peers in profitability. Significant balance sheet improvement was recognized in 2002 focusing on commercial lending and less on long-term commodity type asset growth. The year 2003 will be marked with the favorable repricing of \$28.5 million in high funding cost certificates of deposit originated in 2000. Historically low interest rates and refocused lending efforts have been the primary factors in the Company's rapid decline in its residential real estate loan portfolio, causing profitability to be below projected earnings. The Company's business strategies will continue to focus on the business community in the Baltimore Metropolitan area and the reactivation of Carrollton Mortgage Services, Inc.

Carrollton Mortgage Services, Inc. is a full service mortgage subsidiary of Carrollton Bank offering mortgage products that are being originated and sold in the secondary market. This reactivation will increase fee income in 2003 without significant interest rate risk as these loans will be sold as originated.

Noninterest income continues to be a large contributor to the Company's profitability during this transition period. Noninterest income for the first quarter of 2003 was \$1,913,000 compared to \$1,627,000 in 2002, an increase of 18%. Results for 2003 and 2002 included gains of \$154,000 and \$103,000, respectively, on security sales.

Market conditions continue to adversely affect the profitability of Carrollton Financial Services, Inc. Carrollton Financial Services, Inc. had fee income of \$116,000 in 2003 compared to \$185,000 for the comparable quarter of 2002, a 37% decrease. The Company has taken steps to increase brokerage fee income by licensing existing sales associates to market specific products in our Financial Centers in 2003.

Mr. Altieri stated that management and the Board of Directors believe that earnings will improve based on monthly results and economic forecasts. We believe "the direction and approach we are taking for the future is the proven approach for a more profitable commercial bank. While the prevailing low interest rates on loan products on which we are currently focusing strains our net interest margin, we believe it positions us for a return to more traditional levels in interest rates. We have informed our shareholders of our course of action as well as the fact that it is a multi-year transformation, and we believe that our shareholders see the value in the long-term prospects for the Company, and will bear with us in the process."

Carrollton Bancorp is the parent company of Carrollton Bank, a commercial bank serving the deposit and financing needs of both consumers and businesses through a system of ten branch offices in central Maryland and a network of 153 ATMs located in Maryland, Virginia, and West Virginia of which all ATMs will be fully depreciated prior to the fourth quarter of 2004. The Company provides brokerage services through Carrollton Financial Services, Inc., and mortgage services through Carrollton Mortgage Services, Inc., subsidiaries of the Bank.
